Meeting Objective: To identify shortfalls and potential communication solutions to improve Polk County Service Area response.

I. Welcome & Updates

- a. CAD Improvement Project-Hentzel-None

II. ICS-205

- a. IronMan-Comments-Make sure to reserve all talkgroups on the ISICS Status Board. One user found adding "MICS" to portable gateway comments caused confusion because MICS adds unnecessary detail. It is just a gateway. Correct the EMTAC group to R1EMTAC. Add specific notes in Status Board to go to Regionals if a talkgroup is needed. All comments will be provided to Cameron.
- b. Iowa State Fair Initial View - Verify the repeater used by the CST is correct. Add a talk group to the IA State Fair PD that is blank. All comments will be provided to Cameron.
- c. Best Warrior Competition Overview-Borrowing five radios.
- d. Airport-Not needed for tabletop. More to come for full scale.

III. RINO 2.0

- Is it easier to have point-to-point instead of making a phone call?
- Transport question- Is the network between the three PSAPs improved? Can it go over a public internet network?
- Lockard, Patras, and Dehnert will make a list of pros/cons and provide it to Bearden no later than April 18th.
- All recent known failures are handled using interop talkgroups. Before RINO 2.0 was implemented, there were a lot of disparate systems. Planning has changed and evolved to use interop talkgroups.
- There is value in using the intercom. SR1CAL111 is a reliable alternative

- IV. **Unified Concept of Interoperability**-Dehnert -Will be on the next agenda. There was a desire to put words to the UCOI document. How do you generalize the procedures for interoperability? Email Dehnert if you would like to view and comment on page two of the UCOI.

- V. **Sharing Interoperability Incidents and Opportunities** None
